

Greyhound Lab Result Values

Greyhound bloodwork has enough differences from "other dog" bloodwork to sometimes make it deceptively "normal" or "abnormal" if one isn't familiar with these differences.

Before accepting a medical diagnosis based on lab reports, make sure the values are specific to greyhounds!

	Greyhounds	Other Dogs
RBC:	7.4 - 9.0	5.5 - 8.5
Hgb:	19.0 - 21.5	12.0 - 18.0
PCV/HCT*:	55% -65%	37% - 55%
WBC:	3.5 - 6.5	6.0 - 17.0
Platelets:	80,000 - 200,000	150,000 - 400,000
Total Protein:	4.5 - 6.2	5.4 - 7.8
Globulin:	2.1 - 3.2	2.8 - 4.2
Creatinine:	.8 - 1.6	.0 - 1.0
T4**:	.5 - 3.6	1.52 - 3.60

Reference Source: www.greythealth.com

* A Greyhound with PVC <50% is anemic, check for bacteria/parasites!

** If clinical signs of hypothyroid are present, consider testing T4 with cTSH.
